FLOWER DS 4EC

A 100% natural contact insecticide made with natural pyrethrum.

Flower DS 4EC is suitable for use in Organic Agriculture conforming to European Union (EC)

No. 834/2007 and 889/2008 Regulations

– Inspected by ECOCERT SA F – 32600

Flower DS 4EC offers the following benefits:

- * Very good efficacy on a wide spectrum of insects
- * Zero residues after 24 hours. Ideal for export crop needing to conform to M.R.L.'s
- * Suitable for Post Harvest application
- * Very short re-entry period for workers after spraying
- * Low mammalian/human toxicity
- * Suitable for organic farming
- * Zero phytotoxicity on flowers and vegetables

Flower DS 4EC can be used on its own, but for exceptional results it may be use together with Flower Dust (also supplied by Kapi Limited). Flower DS 4EC controls insects on the crop whilst Flower Dust controls the soil and soil surface.

Flower DS 4 EC is manufactured and distributed by Kapi Limited.

Only available by direct order from Kapi Limited

For further details please contact Winrose on 0710 615 604

FLOWER DUST

Flower Dust is a 100% natural contact insecticide for agricultural use that is supplied in powder form. The active ingredient is pyrethrum at 0.25% w/w

Flower Dust is applied to the soil around the crop at a rate of 200kg per hectare.

Kapi Limited agronomists will assist with training for your first application. The pyrethrum is absorbed into the soil and kills all insects within the soil (including pupae) as well as all insects on the surface (including caterpillars)

Flower Dust provides residual protection in and on the soil for over two weeks. As a natural pyrethrum product no residue will be found on the crop at or after harvest - perfect if you need to conform to Maximum Residue Levels for export crops. Flower Dust is ideal for the control of thrips as it kills the pupae in the soil.

Flower Dust can be used on its own, but for exceptional results it may be used together with Flower DS 4EC (also supplied by Kapi Limited). Flower Dust controls the soil and soil surface whilst Flower DS 4EC controls insects on the crop.

Flower Dust is only available by direct order from Kapi Limited
